# Bank of medical devices donations

Do you have decommissioned or unused medical devices you would like to be **put to good use** by a charity or an NGO?

Are you looking for medical devices to **supply** healthcare facilities in a low- or middle-income country?

Join us and become a member of Humatem!

## What we do:

- + Approve and list medical devices offered for donation
- + Collect devices from donors' facilities
- + Verify the devices functionality
- + Add accessories and technical documentation when needed
- + Check and validate equipment requests made by charitable organisations
- + Advise and support them throughout their project
- + Ensure donations match identified needs of healthcare facilities
- + Pack devices for shipment
- + Monitor donations using reports submitted by NGOs and charities

For donations of medical devices that really meet the needs of low- or middle-income countries

# Expertise and capacity building

Are you planning to strengthen biomedical **maintenance** capacity in a low- or middle-income country?

Are you supporting a biomedical **training scheme**?

Do you need help improving medical equipment **management** in a healthcare facility?

Humatem and its network of biomedical experts carry out missions in the field

- + Support and guidance
- + Preliminary assessment of projects, monitoring and evaluation
- + Delivery of training programme in biomedical engineering and maintenance
- + Installation and commissioning of medical equipments

Promoting the biomedical engineering sector in low- or middle-income countries

# Dialogue and advocacy

Do you wish to raise awareness about...  
... the value of a **biomedical management strategy** amongst health decision-makers?  
... **good practices** for medical equipment donations amongst NGOs and charities?

Humatem organises and takes part in specialised events and can help you prepare and host discussions and workshops

- + Awareness raising activities
- + Seminars and conferences
- + Themed workshops
- + Film screening and debates
- + Advocacy actions

Do you wish to contribute to the **reflection process** by sharing your knowledge and expertise?

Humatem leads several working groups on biomedical topics, welcoming NGOs, charities and health structures

Encouraging dialogue and advancing a framework for good practices
